Full-stack software developer with a B.Sc. in Computer Science and hands-on experience building and maintaining production banking and enterprise systems at LAPO Microfinance Bank. Works across three engineering squads, delivering React/Next.js (TypeScript) frontends for retail internet banking, corporate internet banking and internal bank platforms, and owning a .NET 10 back-office API (clean architecture, EF Core, SQL Server). Experienced in role-based access control, audit logging, KYC workflows, transaction monitoring and CI/CD on Azure DevOps. Seeking a full-stack or senior frontend role where I can ship secure, high-impact financial products.

## EXPERIENCE

**JUN 2025 – PRESENT · LAPO DIGITAL ENGINEERING TEAM (THREE SQUADS)**

### SOFTWARE DEVELOPER, LAPO MIRCOFINACE BANK - LAGOS

**MERIDIAN SQUAD (INTERNAL PROCESS SQUAD) - FULL-STACK DEVELOPER**

- Maintain and deliver regular updates to the LAPO website (frontend, backend and CMS) and support internal tools such as the customer onboarding platform and requisition portal.
- Develop LAPO marketing campaign websites and maintain LAPO's bank apps, updating them whenever new internal solutions go to production.

**CORE SQUAD (RETAIL SQUAD) - FRONTEND ENGINEER**

- Build and maintain the Retail Internet Banking (RIB) web application in Next.js: authentication and onboarding flows (BVN verification, OTP, security questions, PIN setup), transfers, bill payments (airtime, data, electricity, TV, betting), savings and fixed deposits, loans, standing orders, bank statements, KYC, analytics and customer support.
- Took over ownership of the Omnichannel Back-Office Administration Portal backend (.NET 10, ASP.NET Core Web API, EF Core, SQL Server) and maintain it following the original developer's exit, while building and evolving its Next.js/TypeScript frontend.
- Delivered back-office modules covering dashboard monitoring, transaction management (transfers, airtime, bills and investments), customer management, KYC tier-upgrade approval, account opening, BVN watchlist, liveness administration, support complaints, device and card management, referrals and reporting.
- Implemented role-based access control (User Admin, Digital Banking Admin, Compliance Officer, Customer Support and Auditor) with permission-gated UI components, session-timeout handling and an immutable admin audit-log trail, in line with the BRD requirements.

**NEXUS SQUAD (LAPO BUSINESS SQUAD) – FRONTEND ENGINEER**

- Build frontend features for the Corporate Internet Banking (CIB) web application serving LAPO business customers.

**JAN 2025 – MAY 2025**

### NETWORK OPERATIONS OFFICER (NOC), TDS HITECH LIMITED SOLUTION - LAGOS

- Monitor network systems and ensure uninterrupted internet service for enterprise clients.
- Collaborate with technical teams to troubleshoot and resolve system issues.
